

## Meeting 17 September 2009

### Progress

- Conversion -> thesis.pdf, updated with all new progress
- Started tuning filename matching pseudo-user-vector (only using .avi, + largest .avi only(sample.avi)). No results yet, did not extract file sizes yet.
- Moved data from pygme to asmat

### Problems/Questions

- Move all experiments to asmat?
- How to do computational experiments with sql included?
  - Own database, similar database layout to Tribler
  - Tribler code

### Todo

- Spelling checks
- Consistency of terminology
- Re-Structure code
- Experiments
  - Continue progress on filename
  - Start working on swarmnames
